## SUMMARY

Hexagon has 5 years' experience performing document reviews, records processing, and administrative services supporting Fluor Marine Propulsion (FMP) and the Naval Nuclear Propulsion Program (NNPP). Our team includes trained and skilled declassification personnel possessing NNPP derivative declassifier certification, NNPP derivative classifier certification, and certified as Historical Records Restricted Data Reviewers. We provide page-by-page, line-by-line reviews for systematic declassification, mandatory declassification, Freedom of Information Act and Privacy Act, and litigation proceedings for NNPP information. Hexagon ensures that sensitive information requiring protection such as Classified National Security Information, Restricted Data, and Naval Nuclear Propulsion Information is properly and accurately identified and protected to maintain accountability of material. Under our leadership, our team streamlined the review process increasing the programs efficiency.
